## Projects

---

### 1. **Naseni**

NASSENI, the National Agency for Science and Engineering Infrastructure, is a Nigerian government agency focused on promoting the development and utilization of science, technology, and engineering to enhance the nation's industrial capabilities. It plays a key role in advancing Nigeria's technological base and supporting innovation in various sectors. NASSENI aims to reduce the country's dependence on imported technology by fostering local research, development, and manufacturing capabilities unlimited bookings, locations, team members and notifications

**Role :** Frontend Developer

**Duration :** Dec2023 - Feb 2024

#### **Areas of responsibility :**

- Led the front-end development of a dynamic project for NASSENI, overseeing the design and implementation of key features
- Utilized React and Redux to create a robust front-end solution, ensuring a responsive and efficient user interface.
- Addressed complex challenges, such as integrating various user roles (EVC, EVC assistant, director of department, director of assistant, staff) into the application.
- Developed innovative solutions to digitize NASSENI's yearly budgeting and staff management processes, reducing manual workload and promoting a paperless environment.
- Took ownership of the project from inception to completion, handling about 80% of the UI and logic independently, showcasing a high level of initiative and competence.

#### **Features :**

- Took ownership of the project from inception to completion, handling about 80% of the UI and logic independently, showcasing a high level of initiative and competence.
- Took ownership of the project from inception to completion, handling about 80% of the UI and logic independently, showcasing a high level of initiative and competence.
- Simplifies staff management, including profiles, roles, assignments, and performance tracking.
- Transition from manual paperwork to digital, reducing paperwork and increasing efficiency.
- Facilitates payment confirmation and processing, with structured requests for development-related work.

## 2. Usedo Project

"Usedo" is an innovative e-commerce platform enabling users to both buy and sell products within a single interface. It offers a seamless experience where individuals can act as both buyers and sellers, fostering a dynamic marketplace. Users can easily browse through a wide range of products, make purchases, and also list their own items for sale. With robust features for both buyers and sellers, Usedo provides a versatile and convenient online shopping experience.

**Role :** Frontend Developer

**Tech Stack :** Next.js | Redux toolkit | Material UI | storybook || Node.js | Aws | Jira | BigBucket

**Duration :** Sep 2023 - Feb 2024

### **Areas of responsibility :**

- Implemented Redux Toolkit for efficient state management in the front end.
- Integrated localization features to support multi-language functionality.
- Developed responsive design for desktop and mobile compatibility using Next.js and Material UI, ensuring a seamless PWA experience..
- Implemented webhooks to facilitate real-time communication between users and sellers, enhancing user engagement.
- Utilized Storybook design system for streamlined UI development and maintenance..

## 3. Upsale Project

UpSale: AI-powered F&B platform elevating dining experiences. Utilizes advanced menu engineering and Meta Ecosystem to attract new customers. Offers data-driven marketing, loyalty programs, and boosts sales by 20-25% for restaurants. Revolutionizing the industry with innovative technology

**Role :** Backend Developer

**Tech Stack :** Angular | .Net WebApiCore | Node js | SQL

### **Areas of responsibility :**

- Developed and maintained web APIs and webhooks for UpSale
- Collaborated with the team to ensure seamless integration
